

## Preferential Topics by WG C6.13

---

- 1) "Socio-economic and environmental dimensions of access to electricity"
- 2) "Innovative solutions and best practices for electrification of remote areas"
- 3) "Electricity service requirements for domestic consumption as well as for productive use and services in rural areas" (service availability, quality and consumption)
- 4) "Decision guide for cost effective rural electrification" (including technical strategy, administrative innovation and business model)
- 5) "Technical standards for rural electrification systems" (what is available and what is needed)

In topic 1) the environmental impact from access to electricity is included to be discussed since the environmental aspect is of great importance and contribute to improved quality of life for the people.
